
Catalogue Time

With spring sowing season soon upon us, our new catalogues (conventional and organic) are on their way out onto the farms now, so look out for yours landing on your doormat. There are some great new products, including our Simple Herbal Ley which is ideal if you're considering

experimenting with diverse seed mixtures. We've also included a useful guide to growing herbal leys. There's a fresh range of First Hand case studies from across the country, with some inspiring stories and innovative ideas. We're one of the case studies ourselves this year, with an introduction to the eight year crop rotation we've begun at Honeydale Farm. Pleased to say that we've been able to keep most of the prices roughly the same as last year.
