

Animals to Arable Conference

Cotswold Seeds MD and FarmED Founder Ian Wilkinson spoke about herbal leys at the Animals to Arable Conference yesterday, hosted by Innovation for Agriculture on the Elveden Estate. The conference was extremely well attended by farmers from arable districts from Yorkshire to Hampshire, all looking to further integrate livestock into arable farms. Great to see a packed room and packed agenda of exciting talks and discussions by experts including Tim May and Steve Briggs plus lots of opportunities for networking and joint ventures.
