
Thank You

At the end of this extraordinary week we just want to say a huge thank you to our technical advisors, seed mixing team and drivers for their hard work so far this spring. March is always a busy month for farmers and the seed mixtures we provide are vital for them to feed their livestock and manage their farms. For social distancing reasons our seed mixing team has been split into a day and night shift, so they are literally working round the clock to get seed to you as quickly as possible. Thank you to all the delivery drivers who are also playing a huge part in ensuring farmers can continue to receive the seed they need - Paul Totterdell, General

Manager
