

Centre for High Carbon Capture Cropping Website

The CHCx3 Website is now live. The Centre for High Carbon Capture Cropping (CHCx3) is a multi-partner project working towards Carbon Net Zero farming through diversifying cropping options. The website features a Knowledge Hub which includes sections on cropping options, carbon markets, crop output, soil carbon and tillage systems. There are also tools and resources and a news and events section so you can keep up to date with project developments.
