Cotswoldseeds.com

We hope you're finding the new features on our new website helpful. Since the launch last year we've been refining the site to enhance its functionality and add to the wealth of information.

If you know roughly what you're looking for, you can click on the green 'Seeds' button for a good old-fashioned menu of seed mixtures - simply categorised and covering everything from silage and herbal leys to environmental schemes and cover crops, as well as straights. Add to your basket for delivery the next day.

However, if you need some help deciding which mixture best suits your requirements, our new Mix Finder works like an online technical advisor. By asking a set of simple questions, the Mix Finder will fine tune your specific needs and make appropriate suggestions.

But of course we're still here at the end of the phone if you need further advice, or would simply rather just talk to a person!

The Interactive Species Guide

We've been adding plants to the interactive species guide which now includes well over a hundred species, to help you to identify what's growing in your fields.

It covers almost every plant included in our mixtures - over a hundred species of grasses, legumes, herbs, wildflowers, cereals & brassicas and we're adding species all the time. Photography shows each species as seed, seedling, vegetative growth and mature plant, with helpful illustrations showing growth heights and rooting depths.
